

The cost of the broadcast flag is so high that it can not be calculated. The loss to our society by forcing only crippled digital equipment (computers etc) on the United States public is so large that it can not be assigned a number. How many creative works will never happen, how many great scientific and engineering discoveries will never happen simply because the FCC is looking at "cost of parts" and not the true cost to society.

Other Comments:

The FCC has no business getting into Digital Restriction Management. The mandate of the FCC is to provide proper management of the airwaves as a public trust. To that end the FCC needs to act on behalf of the majority of the American public, and not on behalf of industry groups.
